

REGFM B1 Model:

This Blackbox model is developed with the **PSCAD 5.0.2** using the **GFortran 4.6.2** compiler. Please select the appropriate compiler for PSCAD simulation: **File > Application Options > Dependencies > GFortran 4.6.2**

Please update the library path for the blackbox model (.lib file).

Right click on **Resources' > Add > Binary (... .lib) >** browse for **PNNL_REGFM_gf46.lib** file located at **\gf46** folder and add the path. Remove any other inactive .lib file.

An error may appear in case PSCAD attempts to look for .pscx file using an old/non-existent path. To avoid such errors, please select **Project Setting > General >** paste appropriate path of the .pscx file.
